Special Issue: Thermal Analysis and Calorimetry in Polymer Physics, edited by V.B.F. Mathot

Preface ix

Miscibility

Calorimetric analysis of liquid–liquid phase separation
J. Arnauts, R. De Cooman, P. Vandeweerdt, R. Koningsveld and H. Berghmans (Heverlee, Belgium) 1

The use of thermal analysis in the study of liquid–liquid phase separation in blends of some crystallizable homopolymers with their branched copolymers
M.J. Hill, S.J. Organ and P.J. Barham (Bristol, UK) 17

Relaxation and Recovery

The role of thermal analysis in revealing the common molecular nature of transitions in polymers
V.A. Bershtein, V.M. Egorov, L.M. Egorova and V.A. Ryzhov (St. Petersburg, Russian Federation) 41

The thermal characterization of multi-component systems by enthalpy relaxation
G. ten Brinke, L. Oudhuis (Groningen, The Netherlands) and T.S. Ellis (Warren, MI, USA) 75

Structural recovery in isotropic and smectic glasses
D. Lacey, G. Nestor (Hull, UK) and M.J. Richardson (Teddington, Middlesex, UK) 99

Crystallization, Melting and Dissolution

A description of melting and crystallization of eutectic oligomers and copolymers—an application of the physical concepts of colloids
H.G. Kilian (Ulm, Germany) 113

The crystallization behavior of random copolymers of ethylene
R.G. Alamo and L. Mandelkern (Tallahassee, FL, USA) 155

The melting of polymers—a three-phase approach
M. Alsleben and C. Schick (Rostock, Germany) 203

Dielectric relaxation as a probe of interphase structure
P. Cebe and P.P. Huo (Cambridge, MA, USA) 229

The investigation of solution-crystallized polyethylene by slow calorimetry
H. Phuong-Nguyen and G. Delmas (Montreal, Quebec, Canada) 257

Temperature-modulated Calorimetry

Mathematical description of differential scanning calorimetry based on periodic temperature modulation
B. Wunderlich, Y. Jin and A. Boller (Knoxville, TN, USA) 277

Modulated differential scanning calorimetry
M. Reading, A. Luget and R. Wilson (Slough, Berkshire, UK) 295

Multifrequency calorimetry
O.L. Mayorga, A. Navarro Rascon (Granada, Spain) and E. Freire (Baltimore, MD, USA) 309

Pressure as a variable

Differential thermal analysis (DTA) and differential scanning calorimetry (DSC) at high pressures. Experimental techniques and selected results
C. Schmidt, M. Rittmeier-Kettner, H. Becker, J. Ellert, R. Krombach and G.M. Schneider (Bochum, Germany) 321

Influence of high pressure on the phase transitions in linear polysiloxanes as studied by high pressure DTA
A.I. Shulgin, Yu.K. Godovsky and N.N. Makarova (Moscow, Russian Federation) 337
High pressure DSC investigations on *n*-alkanes, *n*-alkane mixtures and polyethylene
G.W.H. Höhne and K. Blankenhorn (Ulm, Germany) 351
Selected thermodynamic aspects of the influence of pressure on polymer systems
S. Vleeshouwers and E. Nies (Eindhoven, The Netherlands) 371
Pressure–volume–temperature studies of semi-crystalline polymers
P. Zoller and Y.A. Fakhreddine (Boulder, CO, USA) 397

Thermophysical Properties
Thermophysical characterization of glassy, cross-linked heterocyclic polymers
V.P. Azarenkov, A.V. Baibak, V.Yu. Kramarenko and V.P. Privalko (Kiev, Ukraine) 417
New possibilities for the study of deformation kinetics and relaxations in polymers using a laser interferometer
N.N. Peschanskaya, P.N. Yakushev, A.B. Sinani and V.A. Bershtein (St. Petersburg, Russian Federation) 429
